**Subject:** OKNA Board comment on changes to Willamette R Superfund ROD

To Whom it May Concern –

The Overlook Neighborhood Association opposes the proposed changes to the original ROD which was issued in January 2017, and developed in collaboration with a broad stakeholder community over more than a decade. The proposed changes are significant and should be proposed during the agreed upon 5-year review; they should not be made by a single stakeholder without reopening discussions to all. We therefore urge you to stick with the current ROD until the 5-year review as this topic is complicated and deserves more time to assess such things as health impacts to other species, environmental impacts, and carcinogenic impacts of PAH mixtures.

Best Regards,

OKNA Board Members
